## About Medicare Remit Easy Print

Medicare Remit Easy Print enables you to print Medicare Part B and DMERC HIPAA X12 835v4010A1 files to a format that is similar to the Standard paper Remittances (SPRs).

You can use Medicare Remit Easy Print to

- view MREP Remittance Advices (see page 53)
- search MREP Remittance Advices (see page 71)
- print MREP Remittance Advices (see page 70)
- print reports about MREP Remittance Advices (see page 129).

You can install Medicare Remit Easy Print on a PC or on a network.

For general information about remittances, see the guide for Medicare providers:  
[http://www.cms.hhs.gov/MLNProducts/downloads/RA\\_Guide\\_Full\\_03-22-06.pdf](http://www.cms.hhs.gov/MLNProducts/downloads/RA_Guide_Full_03-22-06.pdf)

## What's New

### Enhancements

- The MREP Remittance Advice has been modified to accommodate the presence of an NPI value at the 2110 loop and when the submitted (2110.SVC07) and paid units (2110.SVC05) of service are present and differ. Also, when claim line Remittance Advice Remark Code(s) (RARC) are present, they display further into the right on the second line of the claim line.
- The MREP Remittance Advice that is printed from the Claim Detail tab has been modified so that heading information is printed on multiple pages (when multiple pages are present).
- The user has the option to print or suppress the glossary of Remittance Advice Remark Code (RARC) and Claim Adjustment Reason Code (CARC) Update involved with a particular MREP Remittance Advice.  
**Note:** When the user elects to print the glossary of RARCs and CARCs, they will continue to print on a separate page from the remittance advice.
- An MREP Help online system has been incorporated into the MREP software to give the user the opportunity to look up information regarding the functionality (i.e. reports, search function, etc.) of the software rather than referring to the MREP User Guide.
- A user has the capability to automatically import 835v4010A1 remit files when the MREP application is invoked.
- The list of Remittance Advices that display in the top half portion of the MREP main screen has been modified to include a new field, Payee ID (1000B.N104).
- The Search Tab has been modified to allow the user to search on a Rendering NPI value (2110.REF02 value when 2110.REF01 = HPI).
- The following reports are new or have been updated:
  - Deductible Report: This new report only displays those claim lines that have deductible dollar amounts greater than zero. It also displays either the Rendering NPI or the Rendering Provider Number.
  - Other Adjustments Report: This new report displays claims that have Late filing and Interest, and the remittance advices that have Withholding and Forwarding Balances.

- Non-COB Claims Report: This new report displays claims that did not cross over. These claims do not have the value of 19, 20 or 21 in the 2100.CLP02 data field.
- Adjusted Service Line(s), Deductible Service Line(s), Coinsurance Service Line(s), Deductible/Co-Insurance Service Line(s) and Denied Service Line(s) Reports: These existing reports have been modified to display either the Rendering NPI or the Rendering Provider Number.

### Corrected Issues

- The MREP software has been updated so that when a user chooses to resize his/her screen, the screen resizes correctly.
- The MREP software is being updated to correctly account for the dollar amounts in the claim and remit total adjustments when a CR and/or PR group code is present.

## Medicare Remit Easy Print

### Differences between Medicare Remit Easy Print Remittance Advices and Shared System SPRs

## Differences between Medicare Remit Easy Print Remittance Advices and Shared System SPRs

It is important to understand that the Medicare Remit Easy Print Remittance Advice is a representation of the HIPAA 835v4010A1 transaction data. Although CMS has attempted to make the Medicare Remit Easy Print generated Remittance Advice very similar to the Shared System Maintainer generated SPR (received via mail), the printed information and data content at times may differ. So, the two can be compared as long as there is an understanding of why they differ.

For example, the 835v4010A1 transaction data contains reversal (mother) claim information and, in turn, the Medicare Remit Easy Print Remittance Advice displays this information and uses it in the calculation of the entire remittance “totals”. The CMS systems that create the file for the SPR received via mail have the ability to “net” the claim information for adjustments prior to generating the SPR. The 835v4010A1 transaction has no facility to convey the information to allow MREP to “net” the claim information for adjustments prior to generating the Medicare Remit Easy Print Remittance Advice and, therefore, must do a complete back-out of the original claim and “build” a new “adjusted” claim with the modified information.

Item	Medicare Remit Easy Print	Shared System
Adjustments	You must calculate the net. For example: Claim #1 000000000001000 (orig) 000000000001001 (adjst) You calculate:   Claim #2 000000000002000 (orig) 000000000002001 (adjst) You calculate:	The net was calculated for you. For example: Claim #1 000000000001001 -\$20.00   Claim #2 000000000002001 \$50.00
	Provider Paid -\$100.00 \$80.00 Provider Paid -\$20.00 (overpaymt)	Provider Paid -\$20.00
	Provider Paid -\$100.00 \$150.00 Provider Paid \$50.00 (underpaymt)	Provider Paid \$50.00
PREV PD	Always blank	Is calculated for you

## About This Guide

All personal health information has been replaced with fictitious information.

To use this guide, you need to have a working knowledge of Microsoft Windows.

For example, you need to know how to:

- access your desktop
- use the Start menu
- use Microsoft Windows Explorer.

You also need to know common Microsoft Windows terminology. For example, Start > Programs refers to the Programs option on the Start menu.

## PC Requirements

**Recommended speed:**

2.0 GHz or faster

## Operating System Requirements

**Recommended:**

Windows XP

**Others:**

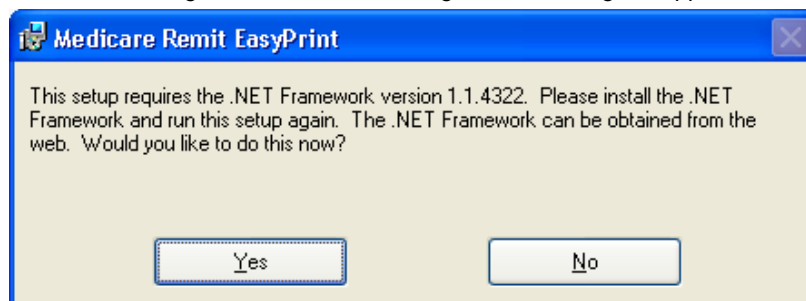

Windows 98 SE

Windows 2000

Windows NT

**.NET Framework:**1.1.4322 (*On the Microsoft web site this is referenced as 1.1*)

This application uses Visual Basic.Net, a Microsoft compatible language, and like many applications that require a MS Windows platform, a .NET framework is required. More than likely you already have a version of the .NET framework on your PC. In order to use this application, you must have .NET framework version 1.1.4322 or a later version installed on each PC that will be using this application. If you do not have this framework installed, you may receive a message similar to the following while installing the application:

By clicking yes—and if you have access to the internet—you will be redirected to the Microsoft web site to download the .NET framework 1.1 (same as the 1.1.4322 version referenced in the message). It is not recommended that you download a beta version of the .NET framework if you are presented with this option on the Microsoft web site.

Outside of the application installation process, you may also use the following link to transport directly to the location on the Microsoft web site to download the 1.1 .NET framework version:

<http://www.microsoft.com/downloads/details.aspx?FamilyId=262D25E3-F589-4842-8157-034D1E7CF3A3&displaylang=en>

If you want to learn more about the 1.1 .NET Framework version and/or determine if you need to install this version, you may use the following link:

<http://msdn.microsoft.com/netframework/downloads/howtoget.asp>

Please follow the directions within the web site when using this link.

If you do not have access to the internet and you receive a message to update your .NET framework, you will have to obtain a copy of the .NET framework from Microsoft. The Medicare Remit Easy Print application will not work without the appropriate .NET framework installed on each machine accessing the application.

**Decompression  
Application:**

To download the Medicare Remit Easy Print program from your Medicare carrier's web site, you must have the following:

- Access to the internet.
- WinZip or a compatible decompression application to extract files. If you do not have a decompression application then you can go to a number of web sites to acquire one (For example: <http://www.winzip.com/downwzeval.htm>.)

## How Does Medicare Remit Easy Print Get Medicare Remittance Info?

You have to import Medicare remittance information into Medicare Remit Easy Print. For more information about importing, see *How to Import the HIPAA 835 File* on page 47.

The files that you import are the ANSI files. For more information about the format of these files, see Appendix A: Remittance Advice/ HIPAA 835 Segment Field Crosswalk on page 136.

When Medicare Remit Easy Print reformats and saves a copy of an HIPAA 835 file, it is called the Import file. For information about how EasyPrint names the Import files, see *Import File Name Format* on page 46.

Medicare Remit Easy Print keeps all of the Import files in the Import folder in the Medicare Remit EasyPrint directory.

## Information for Administrators

The Network Installations and PC Installations sections are for administrators.

Medicare Remit Easy Print can be installed on a PC or network.

## Network Installations

### Medicare Remit Easy Print Directory

There must be sufficient space on the network to save the Import file(s).

The Medicare Remit Easy Print software takes about 3000 KB.

Users must have Read/Write access to the directory where the software is installed because the software creates files and saves them using the user's security privileges to the directory.

### Medicare Remit Easy Print Access

If you need to make Medicare Remit Easy Print available to all users who log on, you need to indicate this during the installation procedure.

### Code Group MSI file

When installing the application on a network, each PC that accesses the application must have installed the Code Group MSI file.

## Pre-Installation Checklist for Installation on a Network

## Installing the Medicare Remit Easy Print Code Group on the PC

After you install the Medicare Remit Easy Print application on the network, you must install the Easy Code Group .msi file on *every* PC that needs to access the application.

### How to Install the Medicare Remit Easy Print Code Group

1. Make sure you know the location of the Medicare Remit Easy Print Code Group file (Step 4 of the Pre-Installation Checklist – page 14).
2. Open Microsoft Windows Explorer and find the Medicare Remit Easy Print Code Group .msi file.
3. Double-click the Medicare Remit Easy Print Code Group .msi file:

The installation completes without opening any windows or displaying any messages.

### How to Know that the Medicare Remit Easy Print Code Group Install Completed Successfully

If the installation DID complete successfully, the PC user can open Medicare Remit Easy Print.

If the installation DID NOT complete successfully, the PC user cannot open Medicare Remit Easy Print and sees this message:

#### Hint:

If you see this error message on the PC, you need to install the Medicare Remit Easy Print Code Group.

You need a minimum screen resolution of 1024 X 768.

Have the user click OK and install the Medicare Remit Easy Print Code Group again.

## PC Installations

### Medicare Remit Easy Print Setup Software

For users to load the software on their PCs, they must know the location of the Medicare Remit Easy Print Setup file.

The file name is:

Medicare Remit Easy Print.msi

### HIPAA 835 File Location

Users must know the location from which to download the HIPAA 835 file they receive from their Medicare carrier.

### Medicare Remit Easy Print Directory

There must be sufficient space on the PC for Medicare Remit Easy Print to save the Import file(s).

The Medicare Remit Easy Print software takes about 3000 KB. The size of the Import file(s) is dependent upon the number of claims found in the HIPAA 835 file.

### Medicare Remit Easy Print Access

The default for installing Medicare Remit Easy Print is to have it be accessible only to a single user on a PC.

## Getting Started

To get started:

1. Complete the Pre-Installation Checklist (page 23).
2. Install Medicare Remit Easy Print on your PC (page 23).

The **Imported files:** folder contains those files once the native 835 files have been imported into Medicare Remit Easy Print.

The **Archive files:** folder contains those files that have been archived from Medicare Remit Easy Print.

The **Exported reports:** folder contains those report files where the user choose to export the reports rather than printing them.

The **X835 native files:** folder contains the native 835 files that are imported into Medicare Remit Easy Print.

The **Resource files:** folder contains the necessary internal files (004010X091A1.FLD and loop.str) for Medicare Remit Easy Print to run. The Codes.ini file is also in this folder, but it is not required for Medicare Remit Easy Print to run. (**Note:** The Codes.ini file contains the descriptions of the Reason and Remark codes. If it is not present, the user receives a generic default message for each Reason and Remark code.)

1. Navigate to the Windows Control Panel Add/Remove Programs.
  - From the taskbar, click Start > Control Panel (Windows 98SE users click Start > Settings > Control Panel).
  - Depending upon your operating system, you will see a window similar to the following:

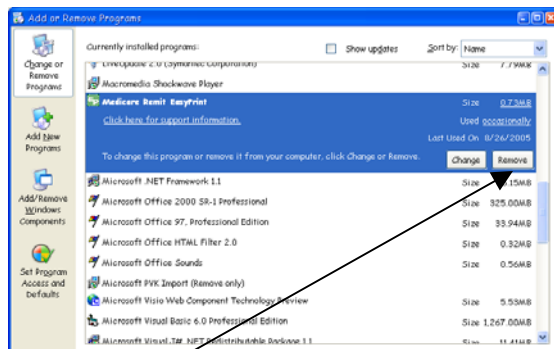

*Windows 2000/XP control panel*

*Windows 98SE control panel*

2. Remove the Medicare Remit Easy Print Application.
  - Double click the Add/Remove Programs icon in the Control Panel.
  - Select Medicare Remit Easy Print from the resulting list.

- Click Remove, then click Yes on the confirmation dialog.

**The Uninstall process is complete!**

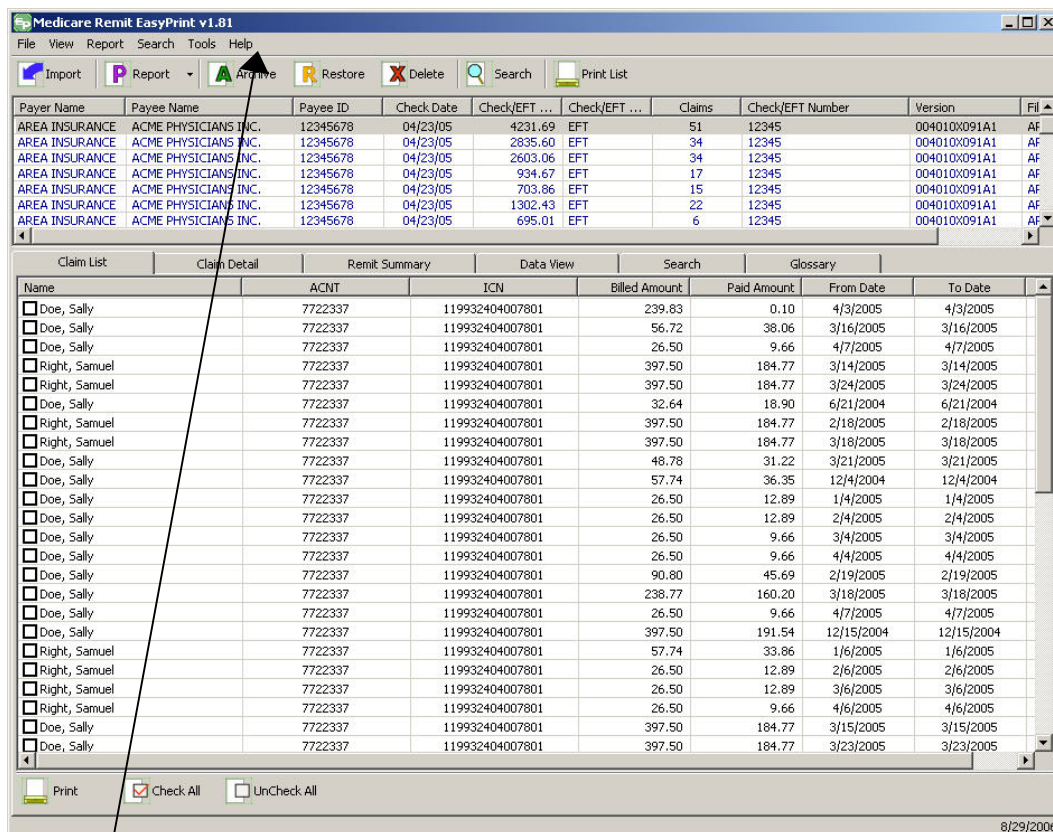

## Online Help System

The Medicare Remit Easy Print (MREP) Help online system allows you to look up information about MREP from MREP itself instead of referring to the Medicare Remit Easy Print User Guide. The online Help system is geared to the day-to-day tasks in MREP. It does not include information regarding the technical aspects of installing or running MREP on a PC or network.

## How to Access the Online Help System

1. Open Medicare Remit Easy Print by double-clicking the Medicare Remit Easy Print icon .

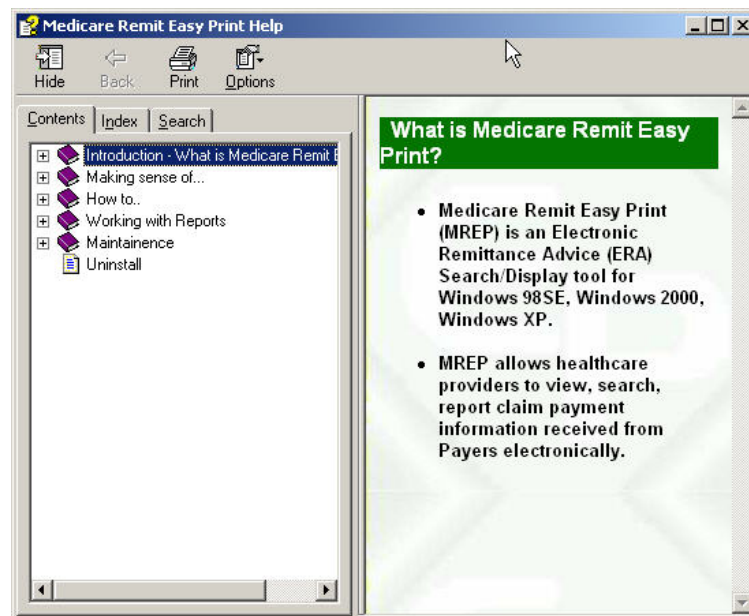

The Medicare Remit Easy Print Claim List tab opens.

2. Click Help.

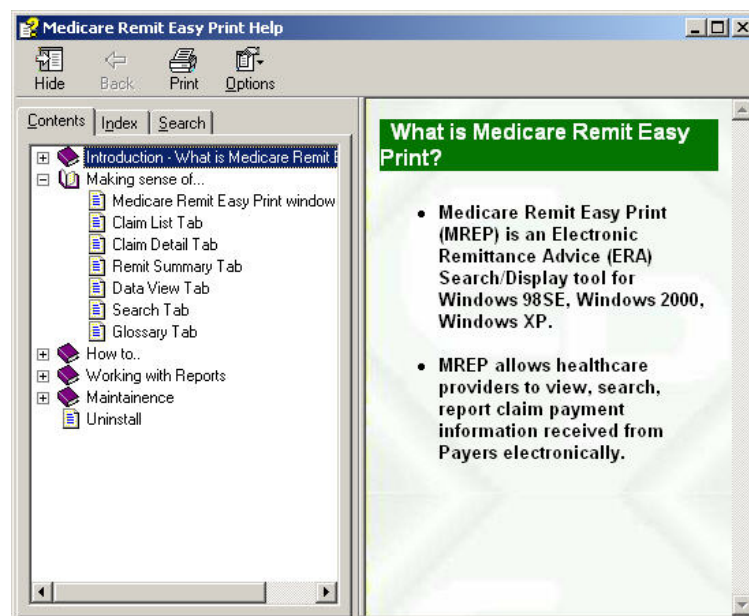

Medicare Remit Easy Print opens the Medicare Remit Easy Print Help window and displays the introduction.

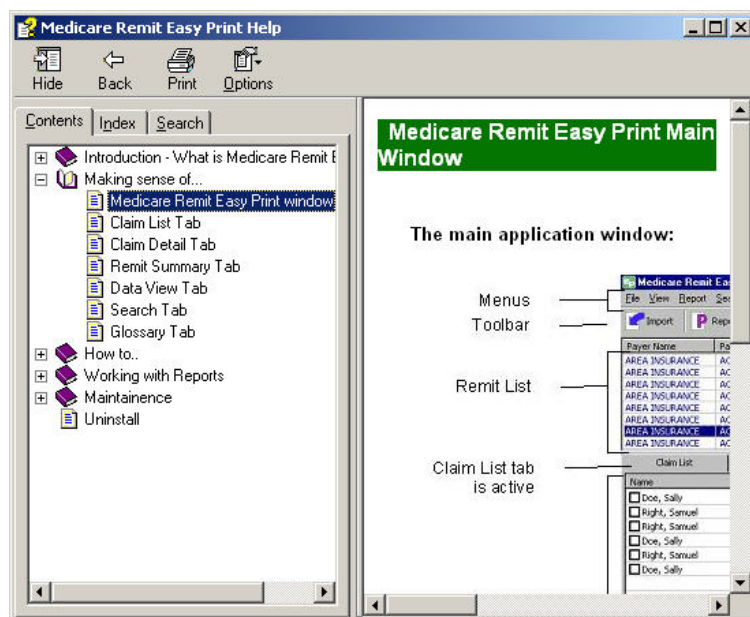

## How to Use the Contents Tab

1. To see what's inside a book, click the + sign.

2. Click a topic to display the topic.

At this point, you can:

Print the topic

View Options

Return to the previous view

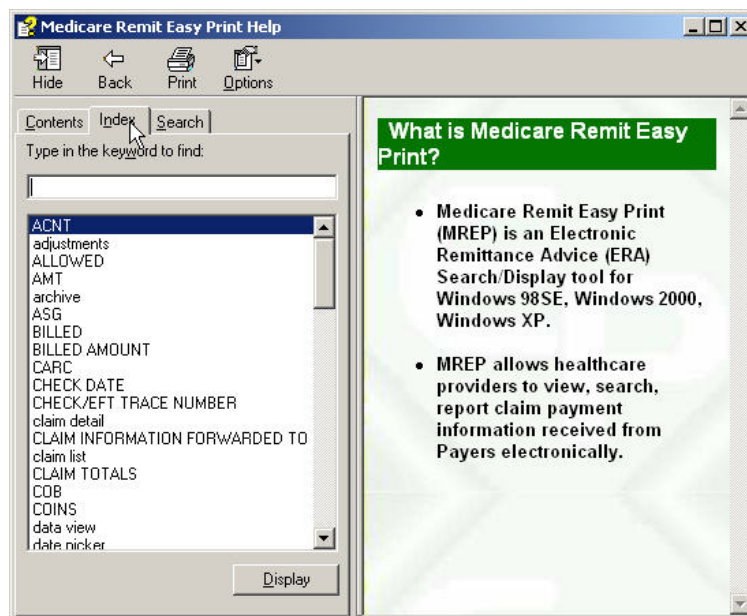

Hide the tab

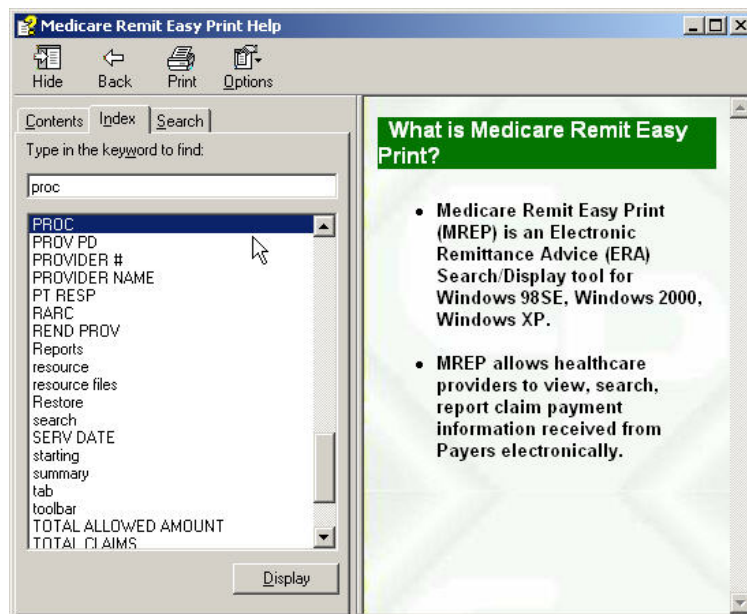

3. To close the book, click the – sign.

## How to Use the Index Tab

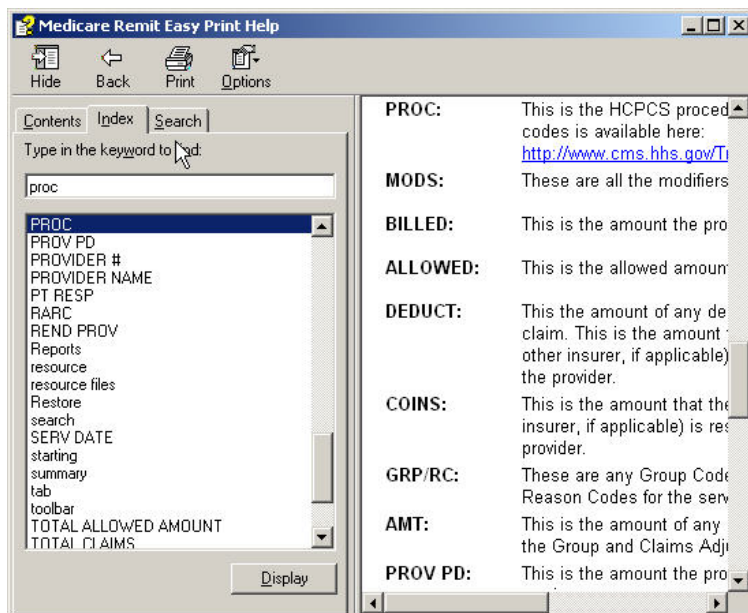

1. Click the Index tab.

2. Type a keyword to find.

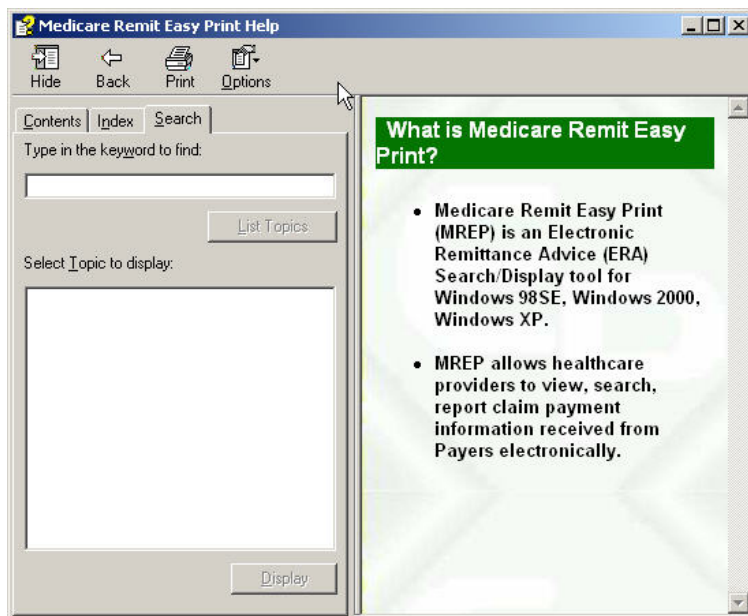

3. Select a keyword by double clicking on it or click the display.

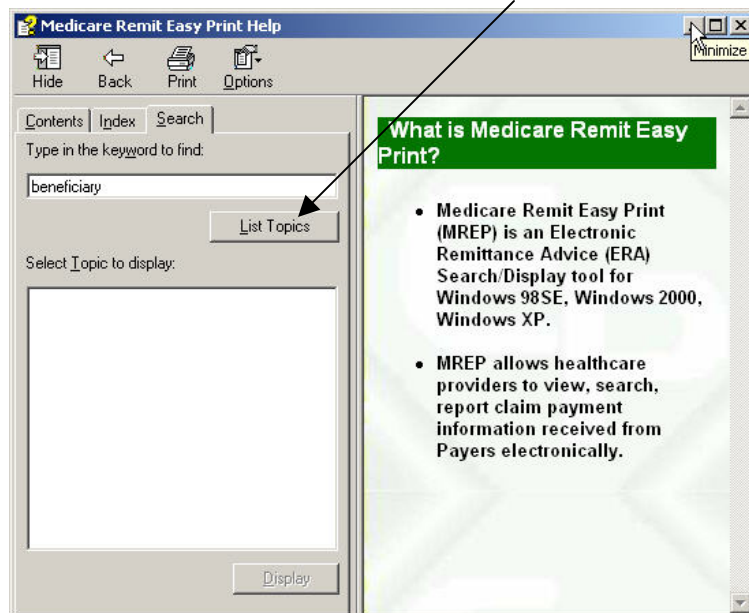

## How to Use the Search Tab

1. Click the Search tab.

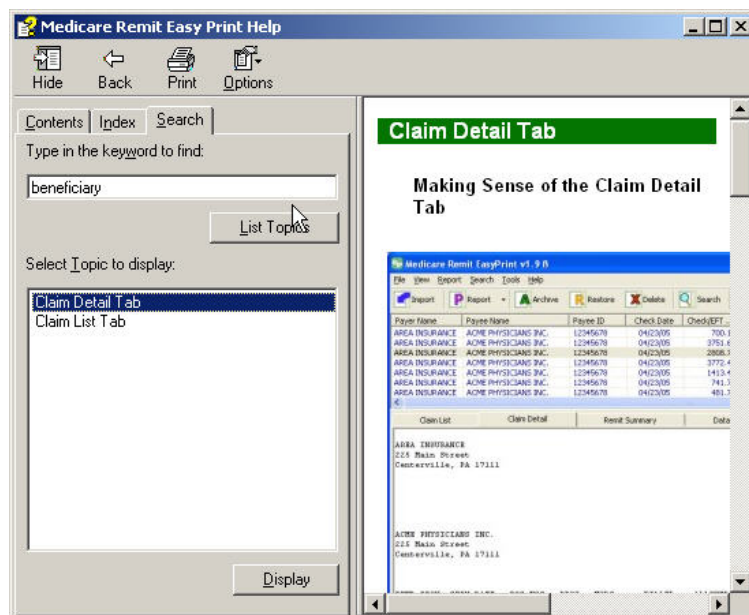

2. Type a keyword to find, then click

3. Once the list of topics displays, double click the one you want.

## How to Close the Medicare Remit Easy Print Help Window

Click the .

The *first time* that you start Medicare Remit Easy Print, you must import an HIPAA 835 file.

## Before You Import the HIPAA 835 File

- Load the Medicare Remit Easy Print program (on a network, see page 14 – or – on your PC, see page 23)
- Know the location of the HIPAA 835 file (Step 4 of the Pre-Installation Checklist – page 23).

When you import the HIPAA 835 file, Medicare Remit Easy Print makes a copy of it, renames it, and stores it in the Import file folder.

PPPPPPPPPPPPPPPPPPPPPPPPPPPPPP	Payer Name – 30 bytes maximum
CCCCCCCCCCCCCCCC	Check/EFT # – 15 bytes maximum

If a file has been imported successfully and you attempt to import the same file, an error record is written to the Import Exception Summary window/report and the file is not imported into the MREP application. Importing a file format other than X12 835v4010A1 or a non-compliant version of a X12 835-formatted file also writes a record to the Import Exception Summary window/report and the file is not imported into the MREP application.

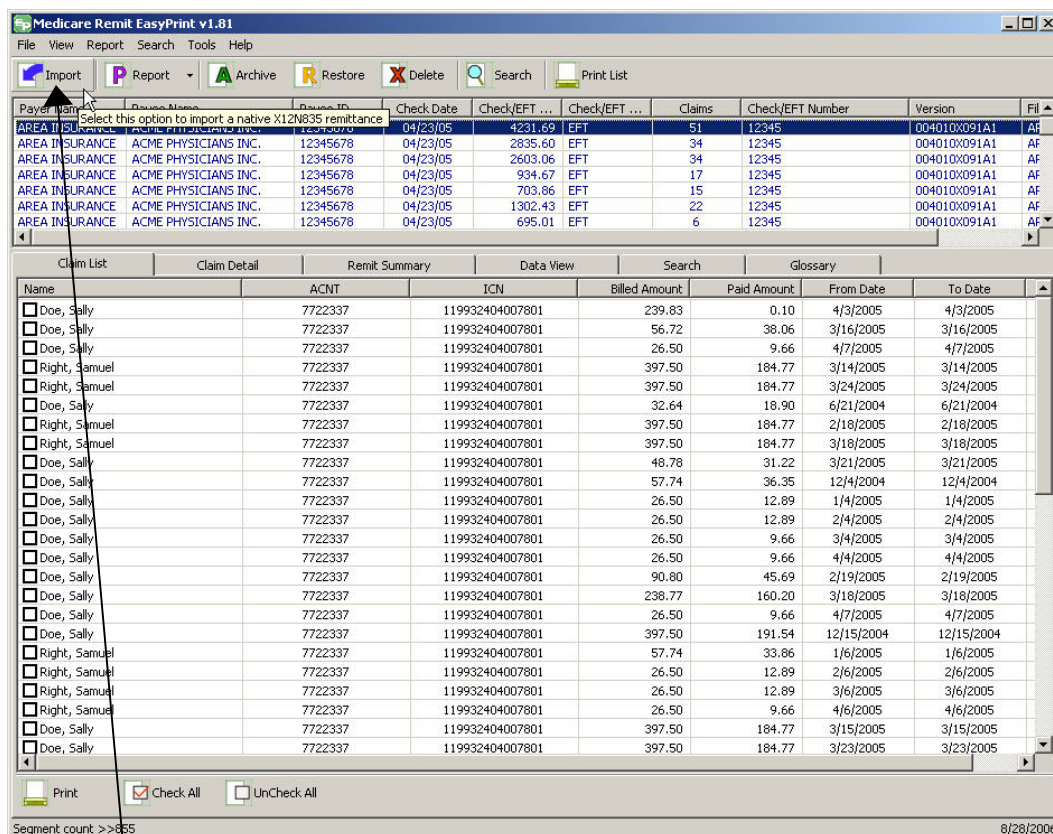

## How to Import the HIPAA 835 File

### Hint:

For information about the **very first time** you import, see Step 1 on page 15.

1. Open Medicare Remit Easy Print by double-clicking the Medicare Remit Easy Print icon .

The Medicare Remit Easy Print Claim List tab opens.

2. Click the Import button.

Medicare Remit Easy Print opens a window for you to select the HIPAA 835 file to import:

3. Select the HIPAA 835 file that you want to import by double-clicking it  
Medicare Remit Easy Print starts the import and lets you know that it is importing:

After the import is finished, the MREP Remittance Advice List window displays.

At this point, you can:

- |                                       |   |
|---------------------------------------|---|
| Work with the MREP Remittance Advices | See <i>Working with MREP Remittance Advices</i> on page 53. |
| Work with Reports                     | See <i>Working with Reports</i> on page 83.                 |

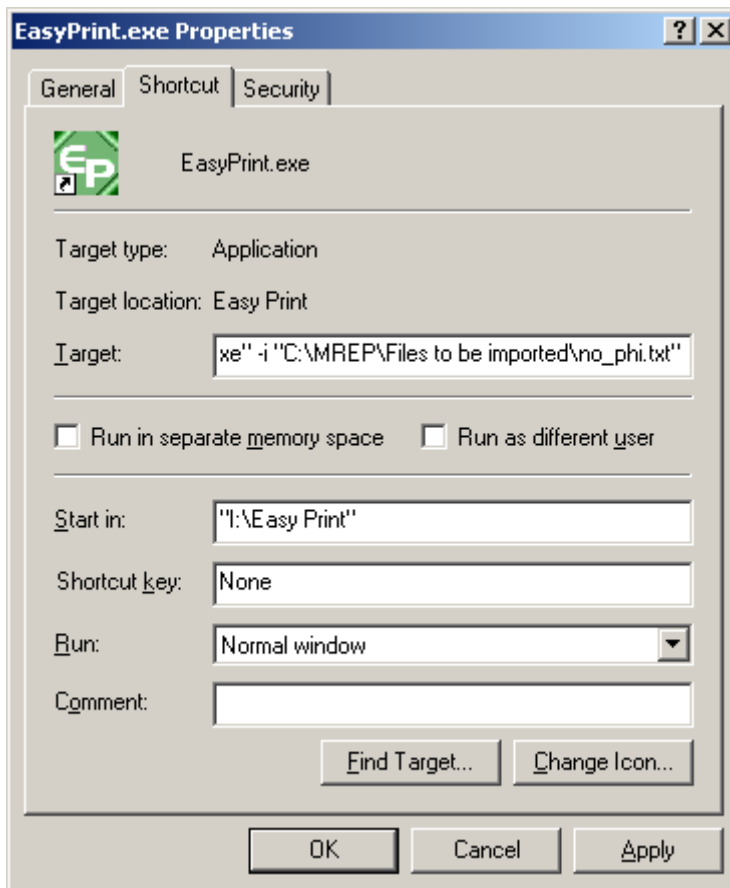

**Note:** Medicare Remit Easy Print reformats and saves a copy of the HIPAA 835 file. This copy is the Import file. If you import the same HIPAA 835 file more than once, Medicare Remit Easy Print will bypass the duplicate file and display the Import Exception Summary Report indicating duplicate remittances were detected.

For information about making sense of the Import file name, see *Import File Name Format* on page 46.

## How to Automatically Import the HIPAA 835 File

1. Close Medicare Remit Easy Print . Right click on the Easy Print icon and click Properties. The EasyPrint.exe Properties window displays:

**Note:** The values in the various fields vary for each MREP user.

2. The Target: value needs to be modified to indicate the location of the files that are to be imported. The user must enter a space after the last double quote, the value of -I or -i (not case sensitive), followed by another space and the pathname. The pathname must be in double quotes. For example, "I:\Easy Print\EasyPrint.exe" -i "C:\MREP\Files to be imported\no\_phi.txt"
3. To save the changes you made to the Target: value, you must click the Apply button.
4. Once you click the Apply button, then you must click the OK button. The Properties window then disappears.
5. You can restart the MREP software.

**Notes:**

- If the user updates the Target: value with a file does not exist, a message similar to the one below appears. Once the user chooses to close this window by clicking the OK button, the MREP software continues to run with the files that have already been imported.

- Each time that the MREP software is invoked, it always accesses the import pathname to attempt to import the data that is contained in the specified file.
- When a duplicate remit file or a file with an invalid data format (not 835v4010A1) is encountered, the Import Exception Summary window appears. As it is today under the current version (v1.8), the user can choose to Print or Close this window. Once the user chooses to close this window, the MREP software will continue to run with files that have already been imported.

You have the option of closing the window or printing the Import Exception Summary. If you choose to print the Import Exception Summary report, the window does not close automatically once the report prints. You need to close the window using the close button or “X-ing” out (top right corner of the Import Exception Summary window). The printing functionality for the Import Exception Summary report follows the existing printing functionality within MREP. Please note that if the window is closed prior to printing the report, the list of import error(s) will be lost. To eliminate the need for file space management, a decision was made to not save the MREP Import Exception errors. To recreate the Import Exception Summary window, the files need to be imported again.

The Import Exception Summary window and report contains three columns of information.

- The first column of information is entitled “Payee”. Depending on what type of error is encountered during the import process, this field could contain data or spaces. The maximum number of bytes of data that can be displayed is 40.
- The second column of information is entitled “Check/EFT #”. Depending on what type of error is encountered during the import process, this field could contain data or spaces. The maximum number of bytes of data that can be displayed is 15.
- The third column of information is entitled “Reason”. Depending on what type of error that is encountered during the import process, there is the possibility of three different messages displaying.

Prior to the three columns of data, the Import Exception Summary window and report contains a heading with the title “File:”. The information following the “File:” heading is the location and name of the file that the attempt is being made to import into the MREP application.

When the Import Exception Summary report prints, the printed version contains an additional heading prior the “File:” heading. It is the first heading on the report. On the left side of the page, the heading displays “Import Exception Summary”. In the center of the page, the heading displays the date and time stamp when the summary report was printed. The format of the date is MM/DD/CCYY. Please note that the leading zero in the month and day will not display – for example: 2/15/2006. The format of the time is HH:MM:SS XX (XX represents AM or PM). On the right side of the page, the heading displays the version of the MREP application that is being used (for example: Easy Print v1.7).

## Working with MREP Remittance Advices

The screenshot displays the Medicare Remit EasyPrint v1.01 application window. At the top, there is a menu bar with File, View, Report, Search, Tools, and Help. Below the menu bar is a toolbar with buttons for Import, Report, Archive, Restore, Delete, Search, and Print List. The main area is divided into two sections. The top section is a table with columns: Payer Name, Payee Name, Payee ID, Check Date, Check/EFT, Check/EFT..., Claims, Check/EFT Number, Version, and Fil. The bottom section is a summary report titled 'PROVIDER PAYMENT SUMMARY REPORT' with a version number 'v1.01' and a VER: 0040100091A1. The report includes fields for PROVIDER NAME, CHECK/EFT TRACE NUMBER, and PROVIDER ID. It also lists various amounts: BILLED AMOUNT, TOTAL REASON CODE ADJUSTMENT AMOUNT, TOTAL ALLOWED AMOUNT, TOTAL COINSURANCE AMOUNT, TOTAL DEDUCTIBLE AMOUNT, TOTAL PAID TO PROVIDER, TOTAL INTEREST AMOUNT, and TOTAL CHECK/EFT AMOUNT. A 'Print' button is located at the bottom left of the summary report area, with a callout line pointing to it from the text 'Click to print the totals'.

## How to Look up a CARC/RARC Code

1. Open Medicare Remit Easy Print by double-clicking the Medicare Remit Easy Print icon .

The Medicare Remit Easy Print Claim List tab opens.

2. On the menu Select Tools > Code Descriptions.

The Code Descriptions window opens:

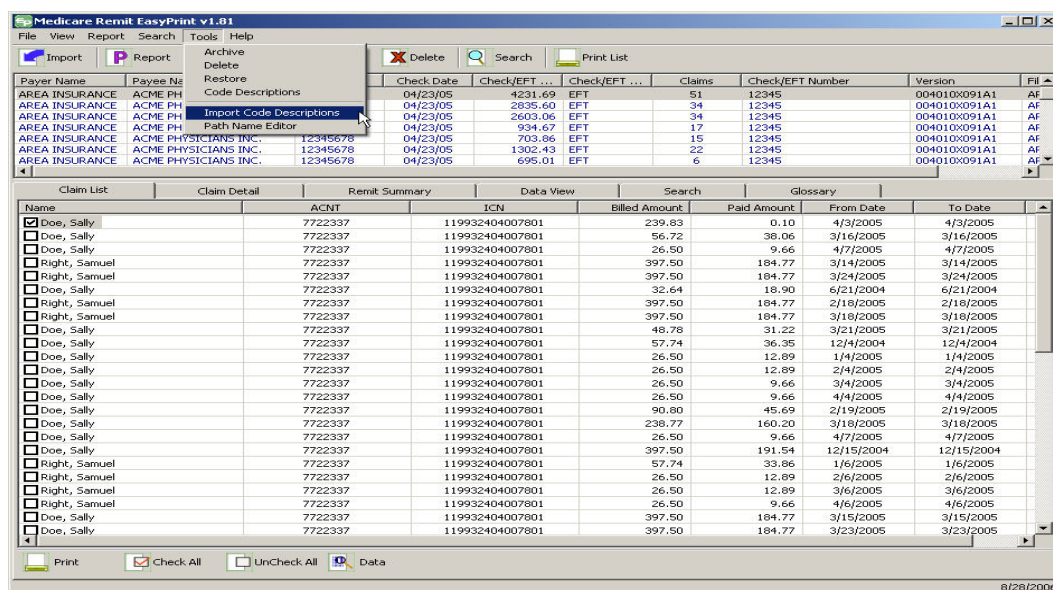

## How to Update (Import) the CARC/RARC Codes

At a minimum, the ANSI Claim Adjustment Reason Code (CARC) and Remittance Advice Remark Code (RARC) file requires an update three times a year. When the list of codes is updated per Washington Publishing Company, VIPS provides an updated file on the VIPS Assist website and CMS provides a link to the updated file on the CMS website for the provider/supplier community. When the user finds it necessary to import this updated file into MREP, follow these instructions:

1. Access the list of the latest codes from the VIPS Assist or CMS website.
2. Save the list of latest codes so that they are easily accessible.

**Note:** The file name *must* be saved as Codes.ini in order for MREP to successfully find the code file.

3. Select "Import Code Descriptions" from the Tools menu.

4. You see this question.

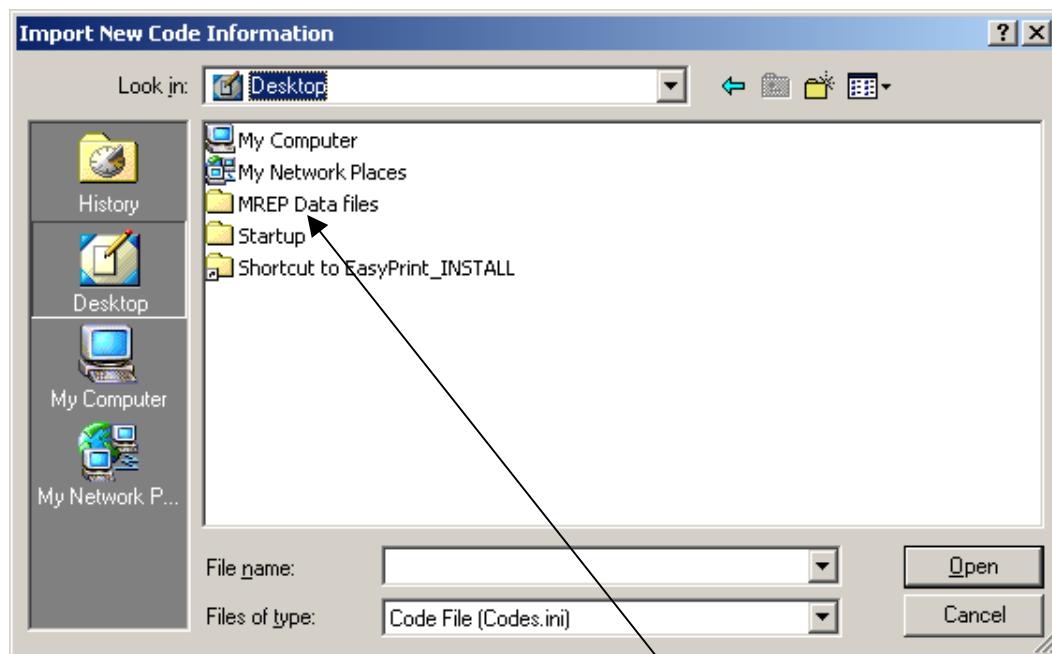

To replace the existing CARC/RARCs, click Yes.

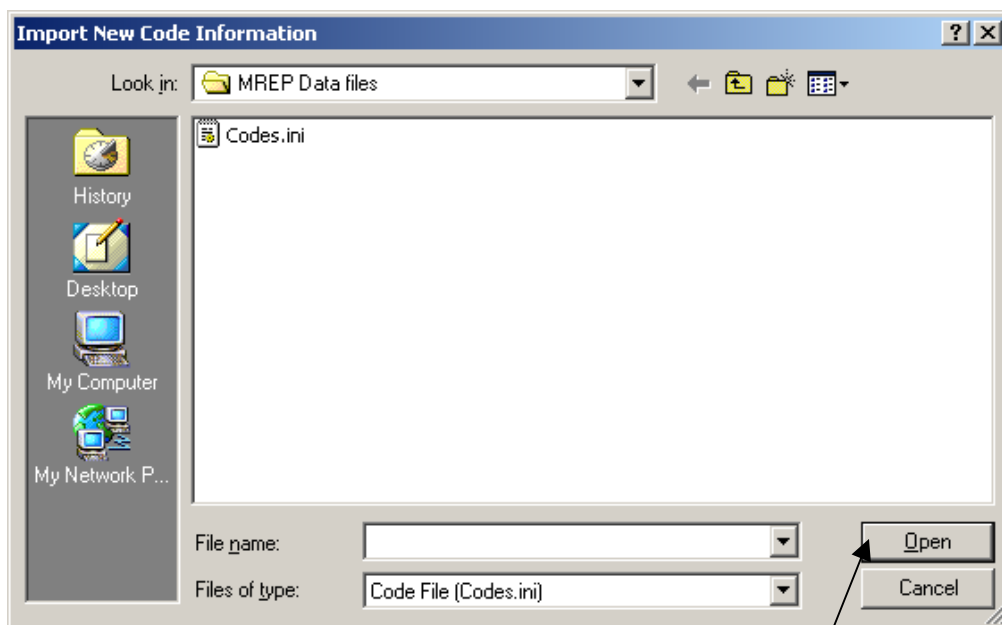

If you don't want to replace the existing CARC/RARCs, click No.

If you select the NO button, the dialogue box disappears and no updates are made to MREP. If you select the YES button, a dialogue box similar to the one below displays.

5. Navigate to the folder or area where you saved the file under step 2. Select the Codes.ini file, then click the Open button.

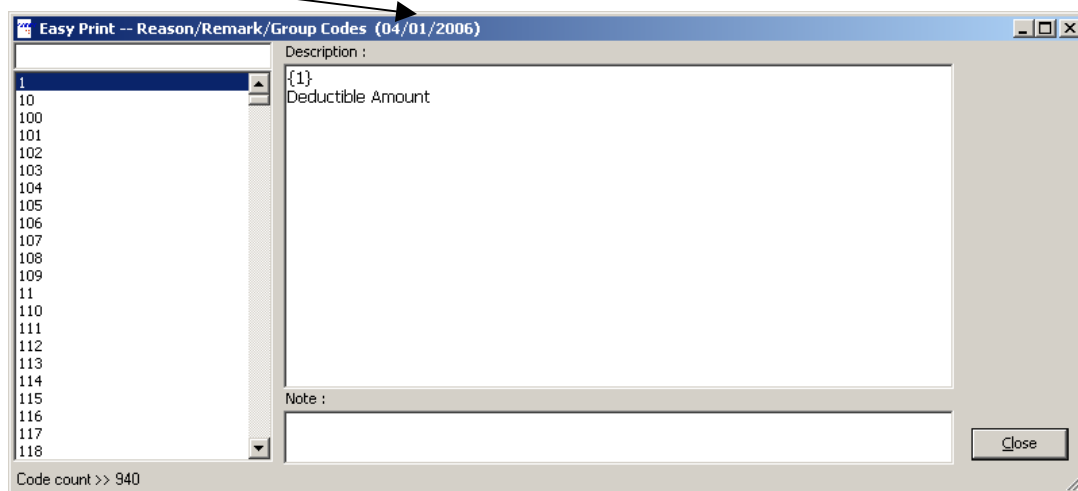

Click the Open button.

6. After you press the Open button, the following message displays:

Click OK.

7. The latest list of CARC/RARCs exist in the MREP application. To verify that the latest version exists, select “Code Descriptions” from the Tools menu. The following dialogue box displays. Please note that the dialogue box includes the date of the latest version of the code list.

## Working with Reports

Medicare Remit Easy Print has 9 different reports:

- Denied Service Lines
- Adjusted Service Lines
- Deductible Service Lines
- Coinsurance Service Lines
- Deductible/Co-Insurance Service Lines
- COB Claims Report
- Non-COB Claims Report
- Other Adjustment Report
- Entire Remittance.

## Making Sense of the Denied Service Lines Report

This report displays claim service lines that have an allowed amount equal to zero *and* are associated with a claim that does NOT have a claim status 22 (reversed claim). The report includes only the lines on the claim that meet these criteria.

## Housekeeping for the Import files

Housekeeping includes:

- Archiving files
- Restoring files
- Deleting files

## Archiving Import files

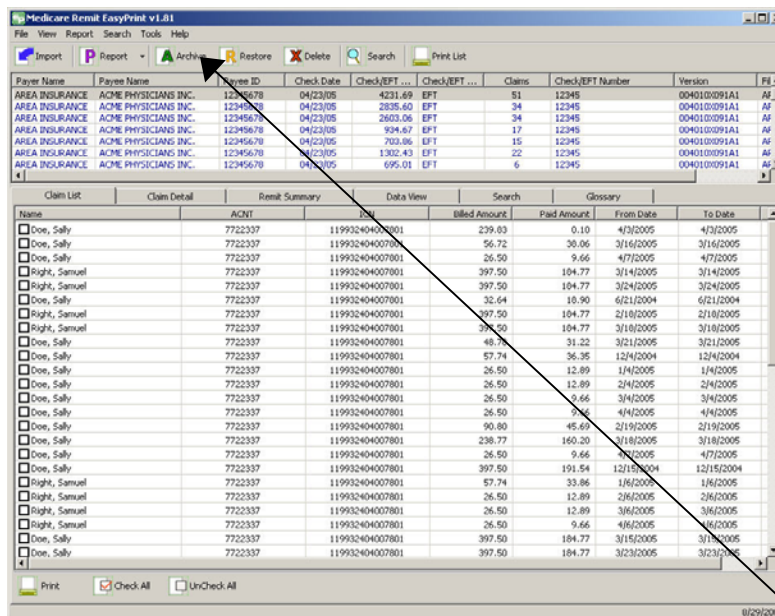

Medicare Remit Easy Print does NOT automatically archive any Import file, and Import files can slow down the processing time of the PC.

Therefore, Medicare Remit Easy Print lets you archive Import files. The location you choose for the archive must have adequate security to protect PHI.

### How to Archive Import files

1. Open Medicare Remit Easy Print by double-clicking the Medicare Remit Easy Print icon .

The Medicare Remit Easy Print Claim List tab opens:

2. On the top of the window, select the file that you want to archive and click the Archive button.

The Archive Imported Files window opens:

Pathname for the Archive folder

### Hint:

You can use the Browse button to specify another location for the archived file.

### Hint:

You can use the Check All checkbox to select all the claims.

3. Select the file(s) you want to archive by checking the box(es).

This activates the Archive button.

4. Click the Archive button.

Medicare Remit Easy Print moves the file to the Archive folder.

## Restoring Import files

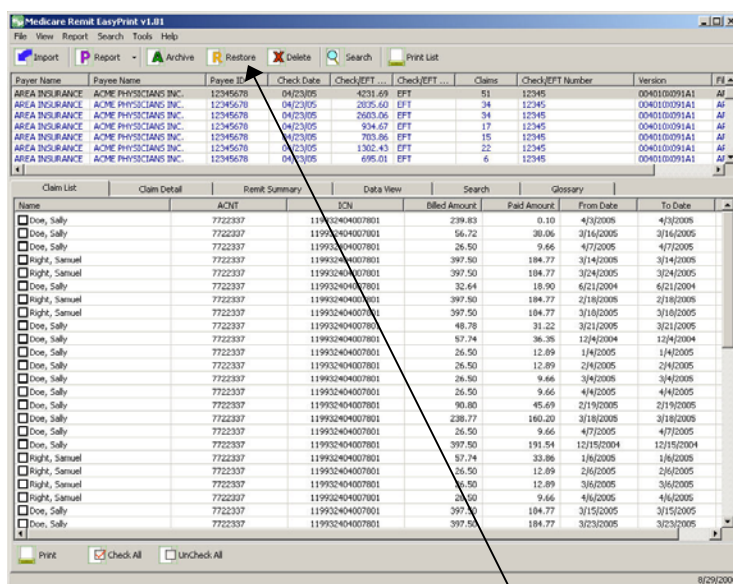

You can restore an Import file after you have archived it.

For information about archiving Import files, see page 131.

### How to Restore Import files

1. Open Medicare Remit Easy Print by double-clicking the Medicare Remit Easy Print icon .

The Medicare Remit Easy Print Claim List tab opens:

2. On the top of the window, click the Restore button.

Use or disclosure of the information contained on this page is subject to the restrictions on the title page of this document.

The Restore Imported Files window opens:

Pathname for  
the Archive  
folder

**Hint:**

You can use  
the Check All  
checkbox to  
select all the  
claims.
